Andrea Procopio

Front-end developer

PORTFOLIO: andreaprocopio-xi.vercel.app

PROFILE

Front-End Developer with **3+ years of professional experience**, specializing in building scalable and high-performance web applications using **Next.js**, **React.js**, **TypeScript**, and **Tailwind CSS**. Strong advocate for **clean**, **maintainable code** and outstanding **user experiences**.

Particularly focused on web **performance**, usability, and accessibility, leveraging tools like **Google Lighthouse** to optimize load times, interactivity, and accessibility scores across projects.

Currently relocating to **Dublin, Ireland** — available for interviews and ready to join on-site teams starting from June 2025

• German – Basic proficiency (A2)

EDUCATION   2013-2018

Finance, Marketing & Management
Luigi Einaudi Institute,
Magenta (Milan, Italy)
Final exam score: 86/100

WORK EXPERIENCE

Pillnovations s.r.l - Front-End Developer   05/2024 – 05/2025

Front-End Developer at a **tech startup**, with full technical ownership of the architecture and development of multiple interfaces: customer platform, internal dashboard, and pharmacies portal.

• Developed and maintained responsive, high-performance web applications using **Next.js**, **React.js**, and **TypeScript**, following modern architectural patterns.
• Translated complex **Figma** designs into **pixel-perfect**, accessible user interfaces using **Tailwind CSS**.
• Improved page **performance** and **Core Web Vitals** through **Lighthouse** audits, lazy loading, streaming UI, dynamic imports, and image optimization (Next/Image).
• Implemented secure **role-based authentication** and user management via AWS Cognito.
• Integrated **Stripe** for seamless **payments** for users and onboarded pharmacies using **Stripe subscriptions**.
• Designed and developed an internal **front-end toolkit** as a **Git submodule**, providing a **shared library** of reusable UI components, layout structures, API hooks, and server actions to ensure consistency and scalability across multiple projects.
• Built an internal **admin dashboard** with custom analytics and role-based access control.
• Collaborated cross-functionally with backend engineers (FastAPI) to integrate RESTful APIs and microservices.

Alittleb.it s.r.l - Front end developer   06/2022-03/2024

Held the role of **Front-End Developer**, responsible for the development and maintenance of the company's proprietary web application specialized in **e-learning solutions**.

• **Maintained** and **extended** the company's proprietary e-learning platform, implementing new features and resolving critical bugs across core user flows.
• Led the creation of a **modular design system** in close collaboration with the design team, using **SCSS** to build a scalable and pixel-perfect component architecture.
• Modernized legacy Ruby on Rails frontend code by progressively **migrating the application** to a modern stack based on **React.js**, **TypeScript**, and **Tailwind CSS**.
• Ensured UI consistency and maintainability through component abstraction, utility-first styling, and reusable layout structures.
• Participated in daily code reviews and sprint planning, ensuring code quality, accessibility, and performance standards.
• Used **GitLab** for version control, **CI pipelines**, and team collaboration in an agile development environment.
